What is/are your favorite piece(s) of music(s) - from a demo production or a scener (released outside of a demo)?:

That's a really hard question... I really admire "synthetic bitch" by Martyn at the moment, but the best tune ever is "Dead Lock" by Elwood

What is/are your favorite picture(s) - from a demo production or a scener(released outside of a demo)?:

I'm not interested in pictures ;-P

What music program are you using the most to express yourself? Why?:

OpenMPT, coz it's the only one I like ^^ It's a really nice tracker, I also like the raw Windows surface more than those FT2-alike trackers...

Which composer, artist or group of the real life did inspire you most?:

I really don't know exactly, probably coz there are too many.

Do you play any instrument? Which?:

Piano, Synthesizer

Which project that you worked on was the most exciting and interesting for you? And why?:

I think there are several... "Unreal Scene" was my second ambient tune and I worked more than a year on it... It takes you on a really nice trip through the rain forest, try it! "Digital Loop" was also very exciting, it was my first tune made with OpenMPT and VST technology.

What is your favorite demo, intro, megademo, retrogame, slideshow, musicdisk, diskmag, wilddemo?:

I don't have real favourites here... To name a few demos and 64ks : Debris, Second Reality, The Popular Demo, STS-02, Blockbuster, Platinum

Which parties do you intend to go to, and which parties would you like to go to? Please describe your personal experiences with your most favourite or impressive party you have ever been at.:

Maybe I'll be at breakpoint next year...

How did the scene alter since you are taking an active part in it? Can you explain why?:

Too short period

Finally, do you have some special greetings? Feel free to add links to your graphics, screenshots of effects, modules or other pieces of your work.:
